

North Tyneside Council

Reference: FOI2618

Request:

John Street Cullercoats NE30

I would be interested to know what the highest speed was recorded in the 20mph zone

Also, the speed monitoring system that was put in place did not get any spell of warm weather which greatly effects the way people drive along the coast and traffic flow.

Also, the monitoring system was placed just before a right-hand turn to access parking, please see photo attached - many cars would of accessed this car park and turned right at a very slow speed, thus fudging the average speed.

Response

This information is currently unavailable as our equipment is still on site. If you wish to find out about this information once it is available (in around 4 weeks' time), then please contact our traffic and road safety team on 0191 643 6090 or you may wish to submit a new Freedom of Information Request.
