**Request:**

This is a freedom of information request under the FOI act 2000.

Please supply the following information:

1. What is the total income from car parking ticket machines at car parks which fall under your authority?

2013/14 – On-street machines - £762,255; Off-street (car park) machines - £344,212

2014/15 - On-street machines - £796,283; Off-street (car park) machines - £349,536

2015/16 - On-street machines - £982,070; Off-street (car park) machines - £472,882

2016/17 – On-street machines - £1,156,749; Off-street (car park) machines - £593,894

Please note that North Tyneside Council offer users an option of payment by mobile telephone at all pay and display machines. The above data is inclusive of the income received through the mobile payment option.

2. How much of that income was derived from 'over paying' sometimes called 'over vending'? To be clear, this happens when - for example - a person parking in a car park seeks to pay for an hours parking which may cost £1.50 but they only have a £2.00 coin and the machine does not offer change.

The current pay and display machines only provide details of the total income taken at the machine, it does not provide data of what proportion of this income is an overpayment of the parking charge.

3. Approximately how many car parking ticket machines do you have in total?

North Tyneside Council have 161 pay and display machines currently operating across the borough.

4. What is the hourly charge on the majority of your car parking ticket machines?

Details of the parking tariffs that apply at all Council managed on-street and off-street charged parking facilities is available on the Council website at

Please supply this information for the last financial year 2016/17

If costs permit please supply the same information for the previous 3 financial years:

2015/16

2014/15

2013/14

In the order above until the cost limit is reached.
