

Accountable Care Systems

Birju Bartoli - February 2018

ACS, STP Mullarkey.....

- Explain what the Northumberland ACS is about and Nland ACO
- How does this fit with the STP/Regional ACS ?
- Some other regional systems, teams, groups etc that should be considered as part of this ?
- Outstanding issues and tricky stuff.....

Northumberland ACS

Place based integrated care (PBIC)

- Based around a natural geographical footprint
- Co-terminous with Council and partnership agreement and CCG
- **Light** local and tactical commissioning function – moving away from traditional contractual discussions
- Reduce commissioning costs significantly
- More of a place-based joint planning mechanism than 2012 type structure
- Ensure choice requirements are met
- All partners in PBIC to agree vehicle of how money is managed, local priorities, ownership of system issues/problems and solutions / based on CCG allocations
- Connection with Regional ACS on broader strategy issues

Some tensions at the centre....

- Footprint , size and other patches North of the Tyne ?
- Fit with Devo ?
- Consolidation and what that means

Regional ACS

- Same footprint as the enlarged STP
- Similar footprint to old SHA.....
- Strategic role for the patch with focus on:
 - Planning
 - Oversight – pulling functions from NHSE and NHSI
 - Strategic commissioning and Spec Com
 - Clinical networks
 - Deanery
 - AHSN
 - Population Health Analytics/Data/Intelligence
 - Regional Digital Strategy ?
- Strategic capital / new capital
- Material service reconfiguration

Subsidiarity is a principle of social organization that holds that social and political issues should be dealt with at the most immediate (or local) level that is consistent with their resolution. The [Oxford English Dictionary](#) defines subsidiarity as "the principle that a central authority should have a subsidiary function, performing only those tasks which cannot be performed at a more local level".^[1] The concept is applicable in the fields of government, [political science](#), [neuropsychology](#), [cybernetics](#), management and in military command ([mission command](#)). Subsidiarity is a general principle of [European Union law](#). In the United States of America, the principle of [States' Rights](#) is enshrined in the constitution. Although the principle is older, its expression in the term "subsidiarity" was first coined in 1891 by the [Roman Catholic Church](#) for its social teaching.

Issues....

- National expectations
- LA engagement
- Clinical Engagement
- Public Engagement
- Branding and politics
- Subsidiarity agreements
- Connections and MOU with ALB's
- Mandate and authority to act
- Legal and governance issues
- People and behaviour
- Next steps....

North Tyneside

- Opportunity to expand the place based integrated care model to incl North Tyneside
- Opportunity for close working – discussions on going with NT council
- Learning and governance arrangements from first phase
- Collective responsibility
- Pace
- We as a local system need to enact the change
